

Export Classifications

Last Update: May 8, 2024

U.S. law applies to all ST Engineering iDirect products, software and technologies until they reach the final end user.

The Encryption License Key software transaction controlled by ST Engineering iDirect that activates AES Encryption on products that have encryption capabilities, the ECCN is 5D002c.1 and subject to Part 740.17(b)(2) of the EAR. An export license may be required depending on the end user and country of destination.
