

STE iDirect Policy on the European REACH Regulation

STE iDirect supports the goals of the European REACH regulation (EC 1907/2006) on the Regulation, Evaluation, Authorization, and Restriction of Chemicals, which aims to protect human health and the environment and which entered into force on June 1, 2007.

STE iDirect meets all applicable REACH requirements and provides its customers with all required information about the substances contained in STE iDirect products. STE iDirect stays current with the list of substances of very high concern (SVHCs) maintained by the European Union Commission under this regulation, and complies with all reporting and registration requirements under REACH with respect to those substances.

All STE iDirect products are within the regulatory threshold of 0.1% (w/w) for any substance currently designated as an SVHC. It is also important to note that STE iDirect products are highly integrated and complex electronic systems, considered “articles” under REACH regulation, as opposed to “substances” or “preparations” and as such, under normal use conditions, users will not come into contact with any SVHC.

For any questions or inquiries related to STE iDirect products and REACH compliance send communication to REACH@idirect.net
